Full-Time Position  
Shift: Mon – Thurs  
6:00a – 4:30p or 5:00p

As a Machinist, you will need to understand how to safely operate CNC mill and lathe machines to produce consistent, quality parts in a timely manner. Individuals who will succeed in this role have keen attention to detail, understand the need for continuous improvement, and take pride in their work.

### Duties will include:

- Operate Lathe, CNC Vertical mills, 5-axis, and water-jet CNC machining center.
- Complete set-ups across a wide variety of CNC equipment.
- Load stock into work holding devices and monitors the machining process
- Make necessary adjustments to maintain nominal print dimensions and required surface finishes
- Perform visual and physical inspection of parts produced to meet quality standards
- Perform accurate transactions (keep record of time, record quantities, close out operation when done, complete appropriate paperwork).
- Provide accurate inventory counts
- Perform a sequence of operation under minimal supervision and consistently maintain performance levels set for quality and quantity.
- Read and understand CNC programs and operational layouts as required
- Maintain a clean and safe work area
- Work as a team member by assisting others in their department as well as other departments and support personnel.
- May be responsible for overseeing machine operators
- Other duties as assigned

### Essential Qualifications

- High School diploma, or equivalent
- Completed at least a 2-year qualified machining program or have at least 3 years of equivalent prior machining experience
- Valid Driver's License

### Desired Experience

- Working knowledge of CAM/CAD software (i.e. SolidWorks)
